

SAMPAT

Productivity Monitoring

Workforce Productivity Intelligence Platform

SAMPAT Productivity Monitoring provides data-driven insights into workforce efficiency while maintaining transparency and compliance with privacy regulations.

The platform focuses on productivity trends and operational patterns rather than intrusive surveillance. It helps organizations understand work behaviours, identify inefficiencies, and optimize workforce performance using actionable data.

Key Features

Active vs Idle Time Analytics

Measures productive work time versus idle periods to identify workflow inefficiencies.

Application & Website Usage Insights

Detailed analysis of applications and websites used during work hours.

Offline Data Synchronization

Activity data continues to be tracked even when devices are offline and automatically synchronizes later.

Live Screen & Remote Access

Secure remote viewing and troubleshooting capabilities for distributed teams.

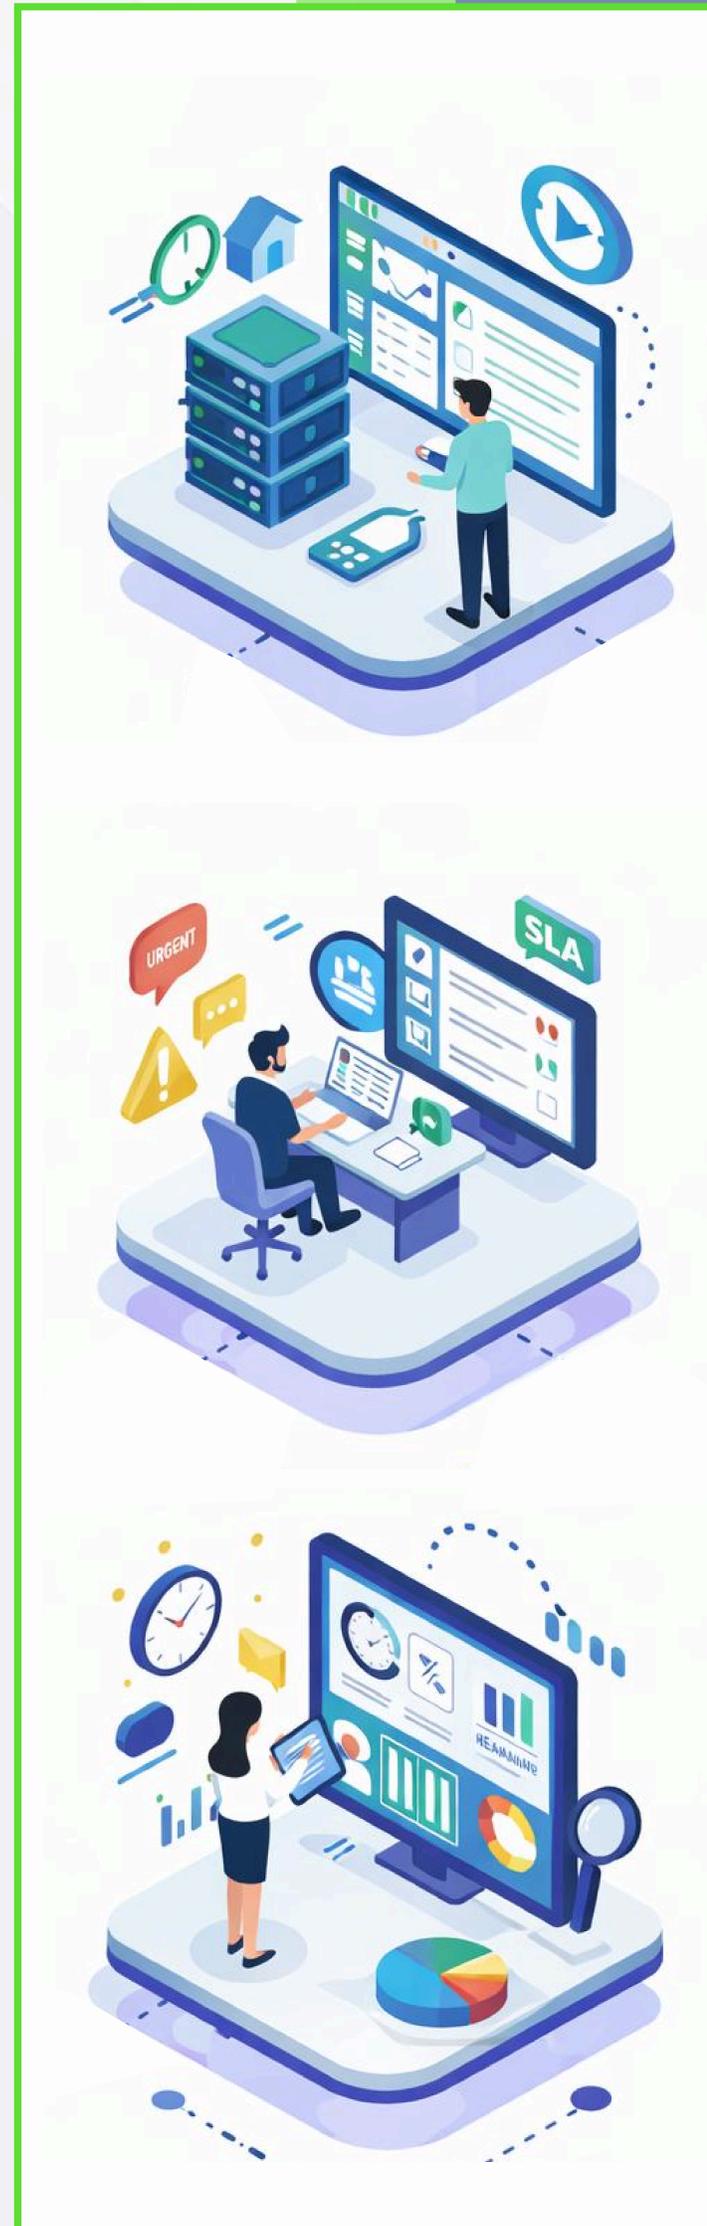

Activity Monitoring & Screenshots

Configurable screenshot capture for compliance, quality assurance, or billing purposes.

AI-Assisted Productivity Insights

Identifies unhealthy work patterns and productivity bottlenecks through AI-based analytics.

Business Benefits

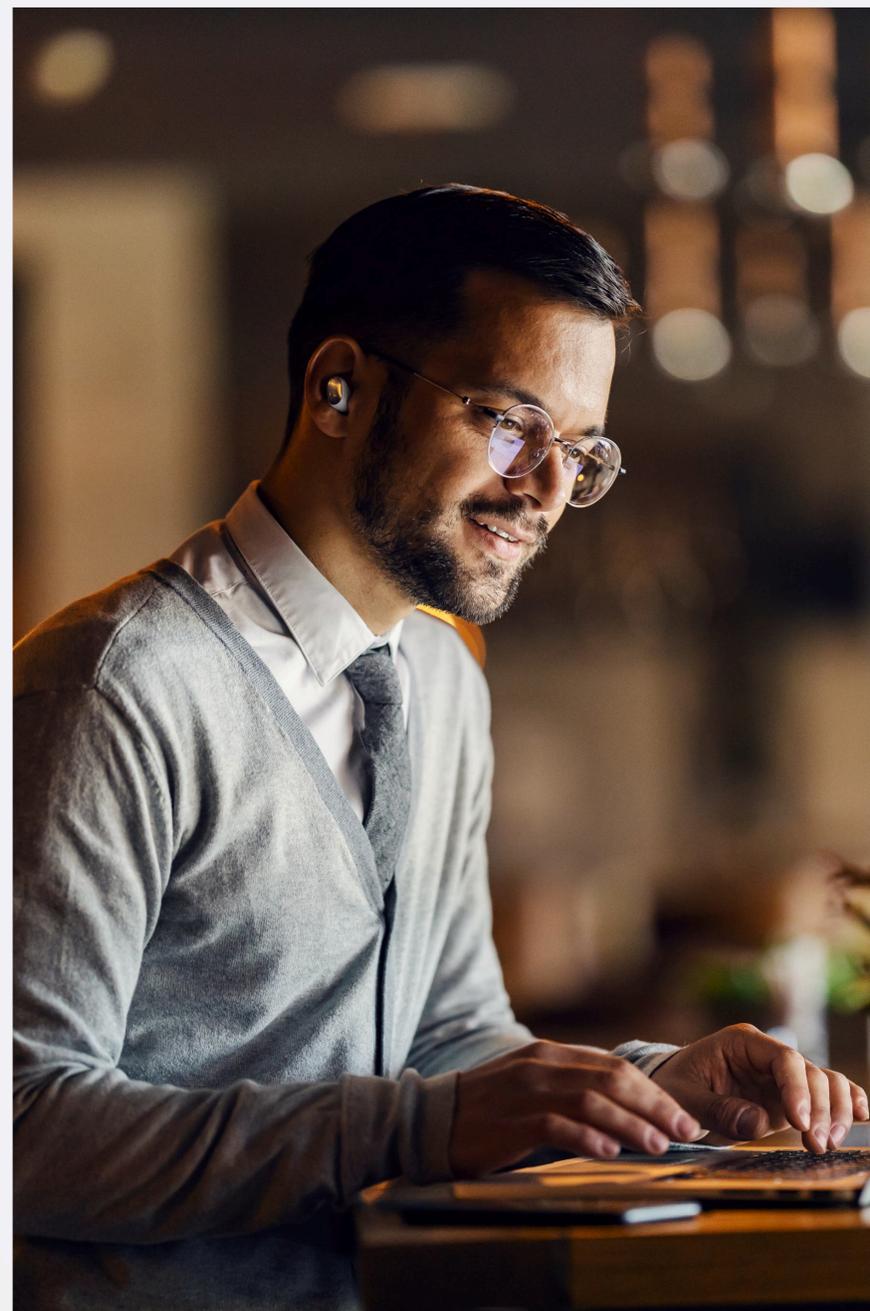

-  Improved workforce accountability
-  Optimized remote work performance
-  Better staffing and resource planning
-  Identification of training needs and skill gaps
-  Reduced idle time and operational inefficiencies
-  Data-backed performance improvement strategies

ROI & Business Impact

Organizations implementing SAMPAT Productivity

Monitoring typically see:

-  30–40% improvement in workforce productivity
-  Better utilization of existing workforce resources
-  Data-driven workforce optimization decisions
-  Reduced operational inefficiencies through behavioural insights

Why Choose SAMPAT

Transparent Productivity Insights

Focuses on productivity trends rather than individual surveillance.

AI-Driven Workforce Analytics

Provides actionable insights to improve performance and operational efficiency.

Enterprise-Ready Monitoring

Designed for remote, hybrid, and distributed workforce environments.

Secure & Scalable Platform

Supports enterprise-level monitoring while maintaining strict privacy compliance.

Schedule a demo to see how SAMPAT can help you optimize workforce productivity.

Product lines of SAMPAT
