

SAMPAT

Asset Management

Enterprise Asset Lifecycle Management

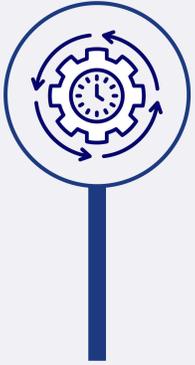

SAMPAT Asset Management provides end-to-end visibility and control over IT, Non-IT, Software's, Bio-Medical, Electrical, Mechanical and any kind of assets across the organization. From procurement to retirement, every asset is tracked, monitored, and optimized to ensure maximum utilization and financial transparency.

The platform enables organizations to maintain accurate inventory records, automate asset lifecycle processes, and gain actionable insights into asset usage and cost management. With intelligent automation and analytics, SAMPAT ensures organizations minimize asset loss, reduce operational risk, and improve financial planning.

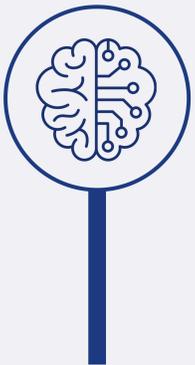

Key Features

AI-Enabled Automated Asset Tracking
Automatically monitors asset status, location, and utilization patterns across departments and locations.

Complete Lifecycle Management
Tracks assets from procurement → deployment → maintenance → retirement ensuring complete lifecycle visibility.

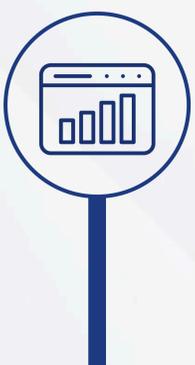

Missing Asset Intelligence
Proactive alerts help identify misplaced or missing assets quickly, preventing asset loss.

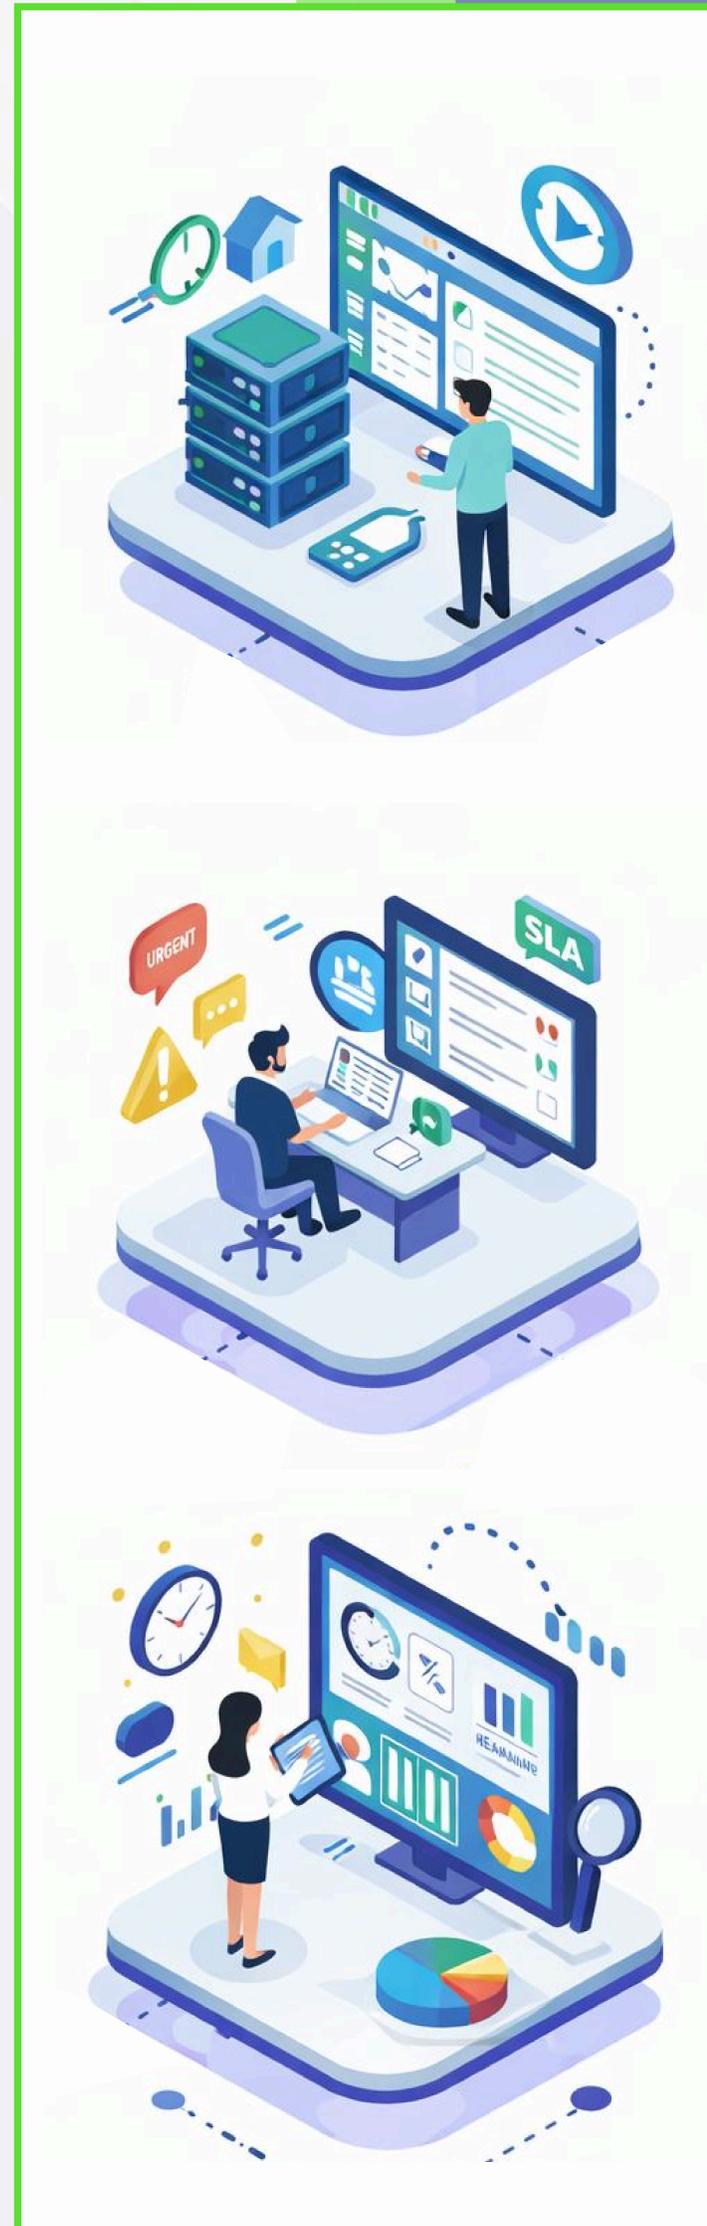

Barcode & QR Code Automation
Mobile-enabled scanning enables rapid asset verification, location updates, and maintenance tracking.

Hardware & Software Change Alerts
Automatic notifications when unauthorized hardware or software modifications occur.

Depreciation & Total Cost of Ownership Dashboards
Real-time financial dashboards showing depreciation, replacement planning, and total asset cost.

Business Benefits

-  Higher asset utilization rates
-  Reduced asset loss and theft
-  Accurate financial reporting through automated depreciation tracking
-  Improved AMC , PM & Calibration Schedules
-  Faster audits with complete asset documentation
-  Reduced manual asset tracking and spreadsheet management

ROI & Business Impact

Organizations implementing SAMPAT Asset Management typically achieve:

-  15–25% reduction in asset-related spending
-  98% inventory accuracy within first 90 days
-  70% faster audit preparation
-  Reduced emergency hardware replacement costs through predictive maintenance
-  Lower software licensing costs by identifying unused or redundant subscriptions

Why Choose SAMPAT

Unified Enterprise Architecture

Built to support any size organizations managing assets, renewals, warranties, maintenance schedules.

AI-Driven Automation

Automatic asset discovery, monitoring, and predictive maintenance alerts reduce manual work.

Enterprise Security & Compliance

Role-based access control, audit logging, and encrypted data storage ensure enterprise-grade security.

Scalable Platform

Supports growing organizations with scalable infrastructure and high availability.
